

ARCHIBUS TEAMS

(Total Environmental Asset Management System)

The availability and veracity of information is vitally important to your short- and long-term business operations. The ability to quickly and easily review and report on that information is a key part of most management functions. The ARCHIBUS Solution Center – Environment + Sustainability Services provides rapidly deployed solutions that address operational needs for environmental performance indicators and measurement, and long-term business needs of risk mitigation. Environmental, health & safety program (EHS) solutions are delivered through our enterprise-wide, web-based ARCHIBUS TEAMS (Total Environmental Asset Management System).

Our integrated solutions utilize personalized dashboards that grant directed access to the information you need to accomplish your specific management goals. This supports strategic decision-making by presenting a vast cross-section of data, and allowing the user to visualize the status of with charts, graphs, and maps. It encourages self-service by creating dashboards for casual users or executives. Our modular solutions allow the user to identify specific functionality required to meet their operational and business needs. Currently, the ARCHIBUS TEAMS modules include:

MSDS Management

Web-based MSDS Inventory
Linked to URLs
